

G4S Risk Management

Health & Safety Belief Statement 2011

- In G4S, we believe that the health and safety of our employees, customers, partners and the communities in which we work is of paramount importance. This is especially vital in the G4S Risk Management group of companies, in the delivery of a range of security, consulting and ordnance management solutions in high risk, complex and typically low infrastructure environments. In these challenging conditions it is particularly important that we protect people and their environments, maintain awareness of physical and mental wellbeing, and set the benchmark for health and safety across the industry.
- To meet these objectives and to ensure that our strategy of continuous improvement is maintained, we have within the last year undertaken a detailed strategic health and safety review of our businesses worldwide, setting targets for reporting and improvement measures.
- Our Executive team believes in the importance of achieving high standards of health and safety, taking into consideration moral, legal and ethical implications. We will ensure that our EHS Management System meets the requirements of the international standard OHSAS 18001.
